DETAILED ACTION

1. Information Disclosure Statement (Paper NO. 5) filed on September 10, 2002 has been entered and considered.
2. The disclosure is objected because of the following informalities:
 - (i) the abstract of the disclosure is lengthy (exceeding 150 words). Correction is required.

Statutory Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-32 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-32 of prior U.S. Patent No. 6,309,829. This is a double patenting rejection.

NonStatutory Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 5,945,284. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims recite the use of 'the plurality of different-sequence primers annealing to primer-complementary regions in one or more target polynucleotides to form one or more target-primer hybrid(s)' in determining the number of repeat sequences in a target nucleic acid, whereas the patented claims disclose the said method using single primer-complementary portion of a target nucleic acid to form target-primer hybrid. However, a mere extension of the patented method to more than one different-sequence primers would have been obvious to one having ordinary skill in the art at the time of claimed invention.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-28 are rejected under 35 U.S.C. 112, second Paragraph, as being incomplete for omitting essential steps that is step (I) in claim 1 on and step (H) in claim 17. Such omission accounts for being indefinite, for failing to address the claims in complete sense and distinctly claim the subject matter which the applicant regards as the invention. The subject matter in claim 1 and claim 17 are considered as confusing for reciting "wherein, (I) prior to step (F)" and "wherein (H) prior to step (F)" because it is unclear of what the unknown step (I) in claim 1 and step (H) in claim 17 are describing about. Amendment to include additional step (I) in claim

Art Unit: 1637

1 and step H in claim 17 and deleting the phrase "wherein" would obviate the rejection. Further, method claims require a last step or phrase in the last step that states the accomplishment of the goals for the method, which were stated in the method's preamble. Claim 1 and 17 lack such a last step (how the determination of repeat units is achieved) and is confusing because the additional method step is not sufficiently set forth. While minute details are not required in method claims, at least the basic steps must be recited in a positive, active fashion. See Ex parte Erlich, 3 USPQ2d1011, p.1011 (Bd. Pat. App. Int. 1986). It is suggested that an amended claim describing the intended steps be submitted.
